Select Tasks

Boot Camp Assistant will help you perform one or more of the following tasks. Select all the tasks you need to perform:

- Create a Windows 7 or later version install disk
You need a USB flash drive and a Windows 7 or later version ISO image downloaded from Microsoft.
- Download the latest Windows support software from Apple
The support software, designed specifically for each Mac, is required to fully support Windows and includes Boot Camp drivers that let you use your Apple keyboard, mouse, trackpad, and built-in camera. If you create a Windows 7 or later version install disk from a USB flash drive, the support software is copied to it. Otherwise, you need an external drive formatted as MS-DOS (FAT).
- Install Windows 7 or later version
This allows you to add a Windows partition and start the installation process, or remove an existing Windows partition from your Mac. If your Mac has multiple hard disks, you can also erase a second disk for use exclusively with Windows. You must use a single full-install Windows installation disc. You cannot use an upgrade version of Windows.
